+92-304-0777025 | Lahore, Punjab, Pakistan | muzamilzaman275@gmail.com
linkedIn.com/muzamil-zaman | github.com/muzamil-zaman | Portfolio

Objective

Motivated Software Engineering undergraduate with hands-on experience in AI, full-stack web development, and machine learning. Passionate about building scalable AI-powered applications using Python, React, FastAPI, and modern web technologies.

Education

The University of Lahore | Lahore

2023 – 2027

Bachelor of Science in Software Engineering — CGPA: 3.02

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, Dart, HTML, CSS, SQL

ML/AI Tools: Deep Learning, NLP, Computer Vision, Data Science, Generative AI, Model, Google Gemini API

Frameworks: React, Flutter, FastAPI, Firebase

Development Tools: Git, GitHub, VS Code, Jupyter, Google Colab, SQLite, MySQL, PostgreSQL, Docker, JWT Auth

Soft Skills: Team Collaboration, Problem Solving, Research, Leadership, Communication, Project Management

Experience

AI/ML Engineering Intern

March 2026 – April 2026

DevelopersHub Corporation | Lahore, Pakistan

- Completed a 6-week internship developing Heart Disease and Crop Recommendation systems using PyTorch and LLaMA 2.
- Executed Deep Learning and LLM tasks including model quantization with QLoRA and fine-tuning large language models
- Earned the Best Award and Certificate DHC-2697 for exceptional performance among intern cohort

Projects

CaseVision — Pakistani Legal Research Platform | Flutter, FastAPI, Firebase, MySQL, Gemini API

2026

- Developed a hybrid Flutter and FastAPI platform for Pakistani legal research as a Final Year Project.
- Implemented Firebase Authentication and Firestore for secure user and case management.
- Built an OCR pipeline using Tesseract, Poppler, and Gemini 2.5 Flash to extract information from FIR documents.

AI Resume Analyzer | React, TypeScript, FastAPI, PostgreSQL, Google Gemini API

2026

- Built an AI-powered resume analyzer with ATS scoring and personalized feedback.
- Developed a full-stack application using React, FastAPI, PostgreSQL, and JWT authentication.
- Integrated PDF/DOCX parsing and Gemini API for resume analysis and job-description matching.

Crop Recommendation System | Python, PyTorch, QLoRA, LLaMA 2

2026

- Built a data-driven system recommending optimal crops from 22 types by analyzing soil nutrients (N, P, K), temperature, humidity, and rainfall
- Benchmarked KNN, Decision Trees, and fine-tuned LLaMA 2 with QLoRA; KNN achieved the highest accuracy for this classification task

Heart Disease Prediction | Python, Scikit-Learn, Pandas, NumPy

2026

- Developed an ML diagnostic tool predicting heart disease risk from clinical indicators such as cholesterol and blood pressure
- Conducted extensive EDA and data normalization; evaluated Logistic Regression and Random Forest classifiers for high reliability

Petrol Pump Management System | PHP, MySQL, HTML, CSS

2025

- Designed a web application automating fuel inventory, sales tracking, employee shift management, and report generation

Certifications

Certificate of Achievement in AI/ML Engineering — DevelopersHub Corporation (DHC-2697)

April 2026
